

## Barrel Length & Caliber Restrictions

You can overheat a suppressor. It's a piece of equipment that is designed to be subjected to high heat, so it definitely has a high rating, but just like any other piece of equipment, it has tolerances and a breaking point.

If you repeatedly run your can hard and hot, it's going to take a toll on the unit over time. If, however, you use it within reason and moderation, then you can greatly extend the lifespan of your suppressor. For the average shooter, it's not unreasonable to expect that you'll get a literal lifetime of shooting out of your can.

### A-027 R2 5.56/.223

**Caliber Rating :** 22-250      **Max Powder Charge:** 36gr

Cartridge	Minimum Barrel Length	Restrictions
5.56mm	10"	Limited Full-Auto w/cool-down periods

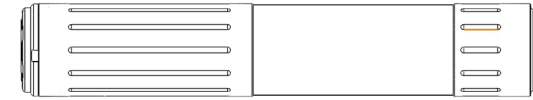

### A-053 "PTAC-30S"

**Caliber Rating :** .300 RUM      **Max Powder Charge:** 100gr

Cartridge	Minimum Barrel Length	Restrictions
5.56mm/.300 BLK	7"	Limited Full-Auto w/cool-down periods
.308 WIN	12"	
.300 WM	16"	
.300 RUM	20"	

### A-024 "PTAC-30L"

**Caliber Rating :** .300 RUM      **Max Powder Charge:** 100gr

Cartridge	Minimum Barrel Length	Restrictions
5.56mm/.300 BLK	7"	Limited Full-Auto w/cool-down periods
.308 WIN	12"	
.300 WM	16"	
.300 RUM	20"	

### A-019 "PTAC-9MM"

**Caliber Rating :** 9MM /.300BLK SUB

Cartridge	Minimum Barrel Length	Restrictions
.300 BLK Sub	10"	Limited Full-Auto w/cool-down periods

### A-032 "PTAC-45ACP"

**Caliber Rating :** 9mm to 45ACP / 300BLK SUB

Cartridge	Minimum Barrel Length	Restrictions
.300 BLK	7"	Limited Full-Auto w/cool-down periods

Failing to Operate within these limits will Void Warranty and could potentially damage Equipment.

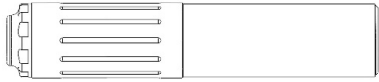

## Barrel Length & Caliber Restrictions
